

Make a wish for the trees

When you have planted your trees you might like to think about what your hopes are for the trees you have planted - or your hopes for any of the more mature trees on the site. One way to mark this is by writing down your hopes and wishes and attaching them to the trees. You can use the template below to print out some leaf shapes to write on. Please use recycled paper and composting-safe ink (most printer inks are safe for composting - but do check) and tie them to the trees gently using natural raffia or similar easily biodegradable string.
